

MUHAMMAD FURQAN

Full-Stack / MERN Stack Developer

Rawat, Islamabad, Pakistan | muhammadfurqanch517@gmail.com | +92-320-5075319 | github.com/furqanch37 | linkedin.com/in/muhammad-furqan-75a3a3233

PROFESSIONAL SUMMARY

Full-Stack Developer with 1.5 years of production experience shipping 3 live commercial platforms across Brazil and Oman. Specialist in React, Next.js, and Node.js ecosystems, integrating Stripe, Thawani Pay, Firebase, and AWS S3 in revenue-generating products. Track record of owning complete product lifecycles from UI to API design to cloud deployment, with measurable impact on performance, SEO, and user experience.

EXPERIENCE

Frontend Developer — Dev-Xcel

Rawat Technology Park | Aug 2025 – Present

- Engineered 6+ production-grade React/Next.js components adopted across 3 active client projects, reducing UI duplication by an estimated 40% through reusable design patterns.
- Cut average page load time by optimizing image pipelines and lazy-loading strategies, achieving consistent Lighthouse performance scores above 90.
- Established API integration standards with backend teams that reduced cross-team debugging sessions by eliminating mismatched contract assumptions on 4 consecutive feature releases.
- Led UI refactor on a high-traffic module, improving mobile responsiveness from 62 to 94 on Google PageSpeed Insights.

MERN Stack Developer — GoNetwork

Rawat Technology Park | May 2025 – Aug 2025

- Delivered full-stack features across 2 production applications in 3 months using MongoDB, Express.js, React.js, Next.js, and Node.js, with zero regression issues on deployment.
- Designed and implemented 12+ RESTful API endpoints handling real-time data operations, reducing average server response time by 30% through query optimization and response caching.
- Rebuilt 4 legacy UI components, cutting client-side rendering time by 25% and eliminating 3 reported UX complaints within the first sprint.

Full-Stack Intern — TPWITS

Rawat Technology Park | Oct 2024 – May 2025

- Completed an 8-month internship on the PERN stack (PostgreSQL, Express.js, React.js, Node.js), shipping 5 internal UI modules used daily by the team.
- Designed a PostgreSQL schema for a multi-table data workflow that reduced query complexity from 8 joins to 3 through normalization, adopted into production.
- Built 8 RESTful API endpoints consumed by both web and mobile clients, passing 100% of QA test cases on first submission.

TECHNICAL PROJECTS

Casa Corididi — Brazilian E-commerce Platform (Live)

Next.js, Tailwind CSS, FastAPI, Stripe, AWS S3, Resend

- Architected an end-to-end full-stack platform from zero, covering frontend, API, payments, email, and cloud storage, serving a live Brazilian market with 100% uptime since launch.
- Integrated Stripe payment processing handling secure end-to-end transactions with automated transactional email workflows via Resend, removing all manual order notifications.
- Implemented AWS S3 for cloud image delivery, reducing image load time by an estimated 60% compared to server-hosted assets through CDN-backed distribution.

- Achieved an SEO-optimized architecture with Next.js SSR/ISR, improving organic discoverability for the Brazilian market.

Tallah — Omani Multilingual E-commerce Platform (Live)

Next.js, Firebase Auth, FastAPI, Thawani Pay, Admin Dashboard

- Built a complete bilingual (English and Arabic/RTL) e-commerce platform tailored for the Omani market, one of the more technically complex localization challenges in web development.
- Integrated Thawani Pay, Oman's leading payment gateway, alongside Firebase Authentication, enabling fully localized, secure checkout for Omani customers.
- Engineered a real-time admin dashboard tracking live inventory, order status, and platform analytics, eliminating reliance on manual reporting.
- Implemented Firebase Security Rules at the document level to ensure zero cross-user data access across all transactions.

Tallah Web — Full-Stack Firebase Platform (Live)

React.js, MUI, Firebase Cloud Functions, Firestore, Auth, Hosting

- Built and deployed scalable Firebase Cloud Functions handling core business logic, user authentication flows, and real-time data processing for a live production platform serving Omani users, with zero reported downtime incidents.
- Owned the full frontend in React.js and Material UI (MUI), delivering a responsive interface while integrating and debugging 10+ API endpoints, reducing reported integration failures to zero across 3 release cycles in a live production environment.
- Leveraged Firestore real-time listeners and Firebase Hosting to support high-availability features, ensuring seamless data sync across sessions for all active users with sub-second update latency.

TECHNICAL SKILLS

Core Stack: React.js, Next.js, Node.js, Express.js, MongoDB (MERN)

Languages: JavaScript (ES6+), TypeScript (working knowledge), Python, HTML5, CSS3

Styling: Tailwind CSS, Material UI (MUI)

Backend / API: FastAPI, RESTful APIs, Firebase Cloud Functions, PostgreSQL

Cloud & DevOps: AWS S3, Firebase (Auth, Firestore, Hosting), Vercel, Git / GitHub

Payments: Stripe, Thawani Pay, Paymob

EDUCATION

BSc Information Engineering Technology — National Skills University Islamabad (NSU)

HEC Recognized | UNESCO/UNEVOC Member | CGPA: 2.86/4.0 | 2021 – 2025
